Data3Sixty™ Govern

What does the
data mean?

Where does the
data come from?

Can I
trust it?

Is it the same
thing to everyone?

How do
I find it?

Who do
I ask?

The Data "Hairball"

Infogix Data3Sixty™ Govern
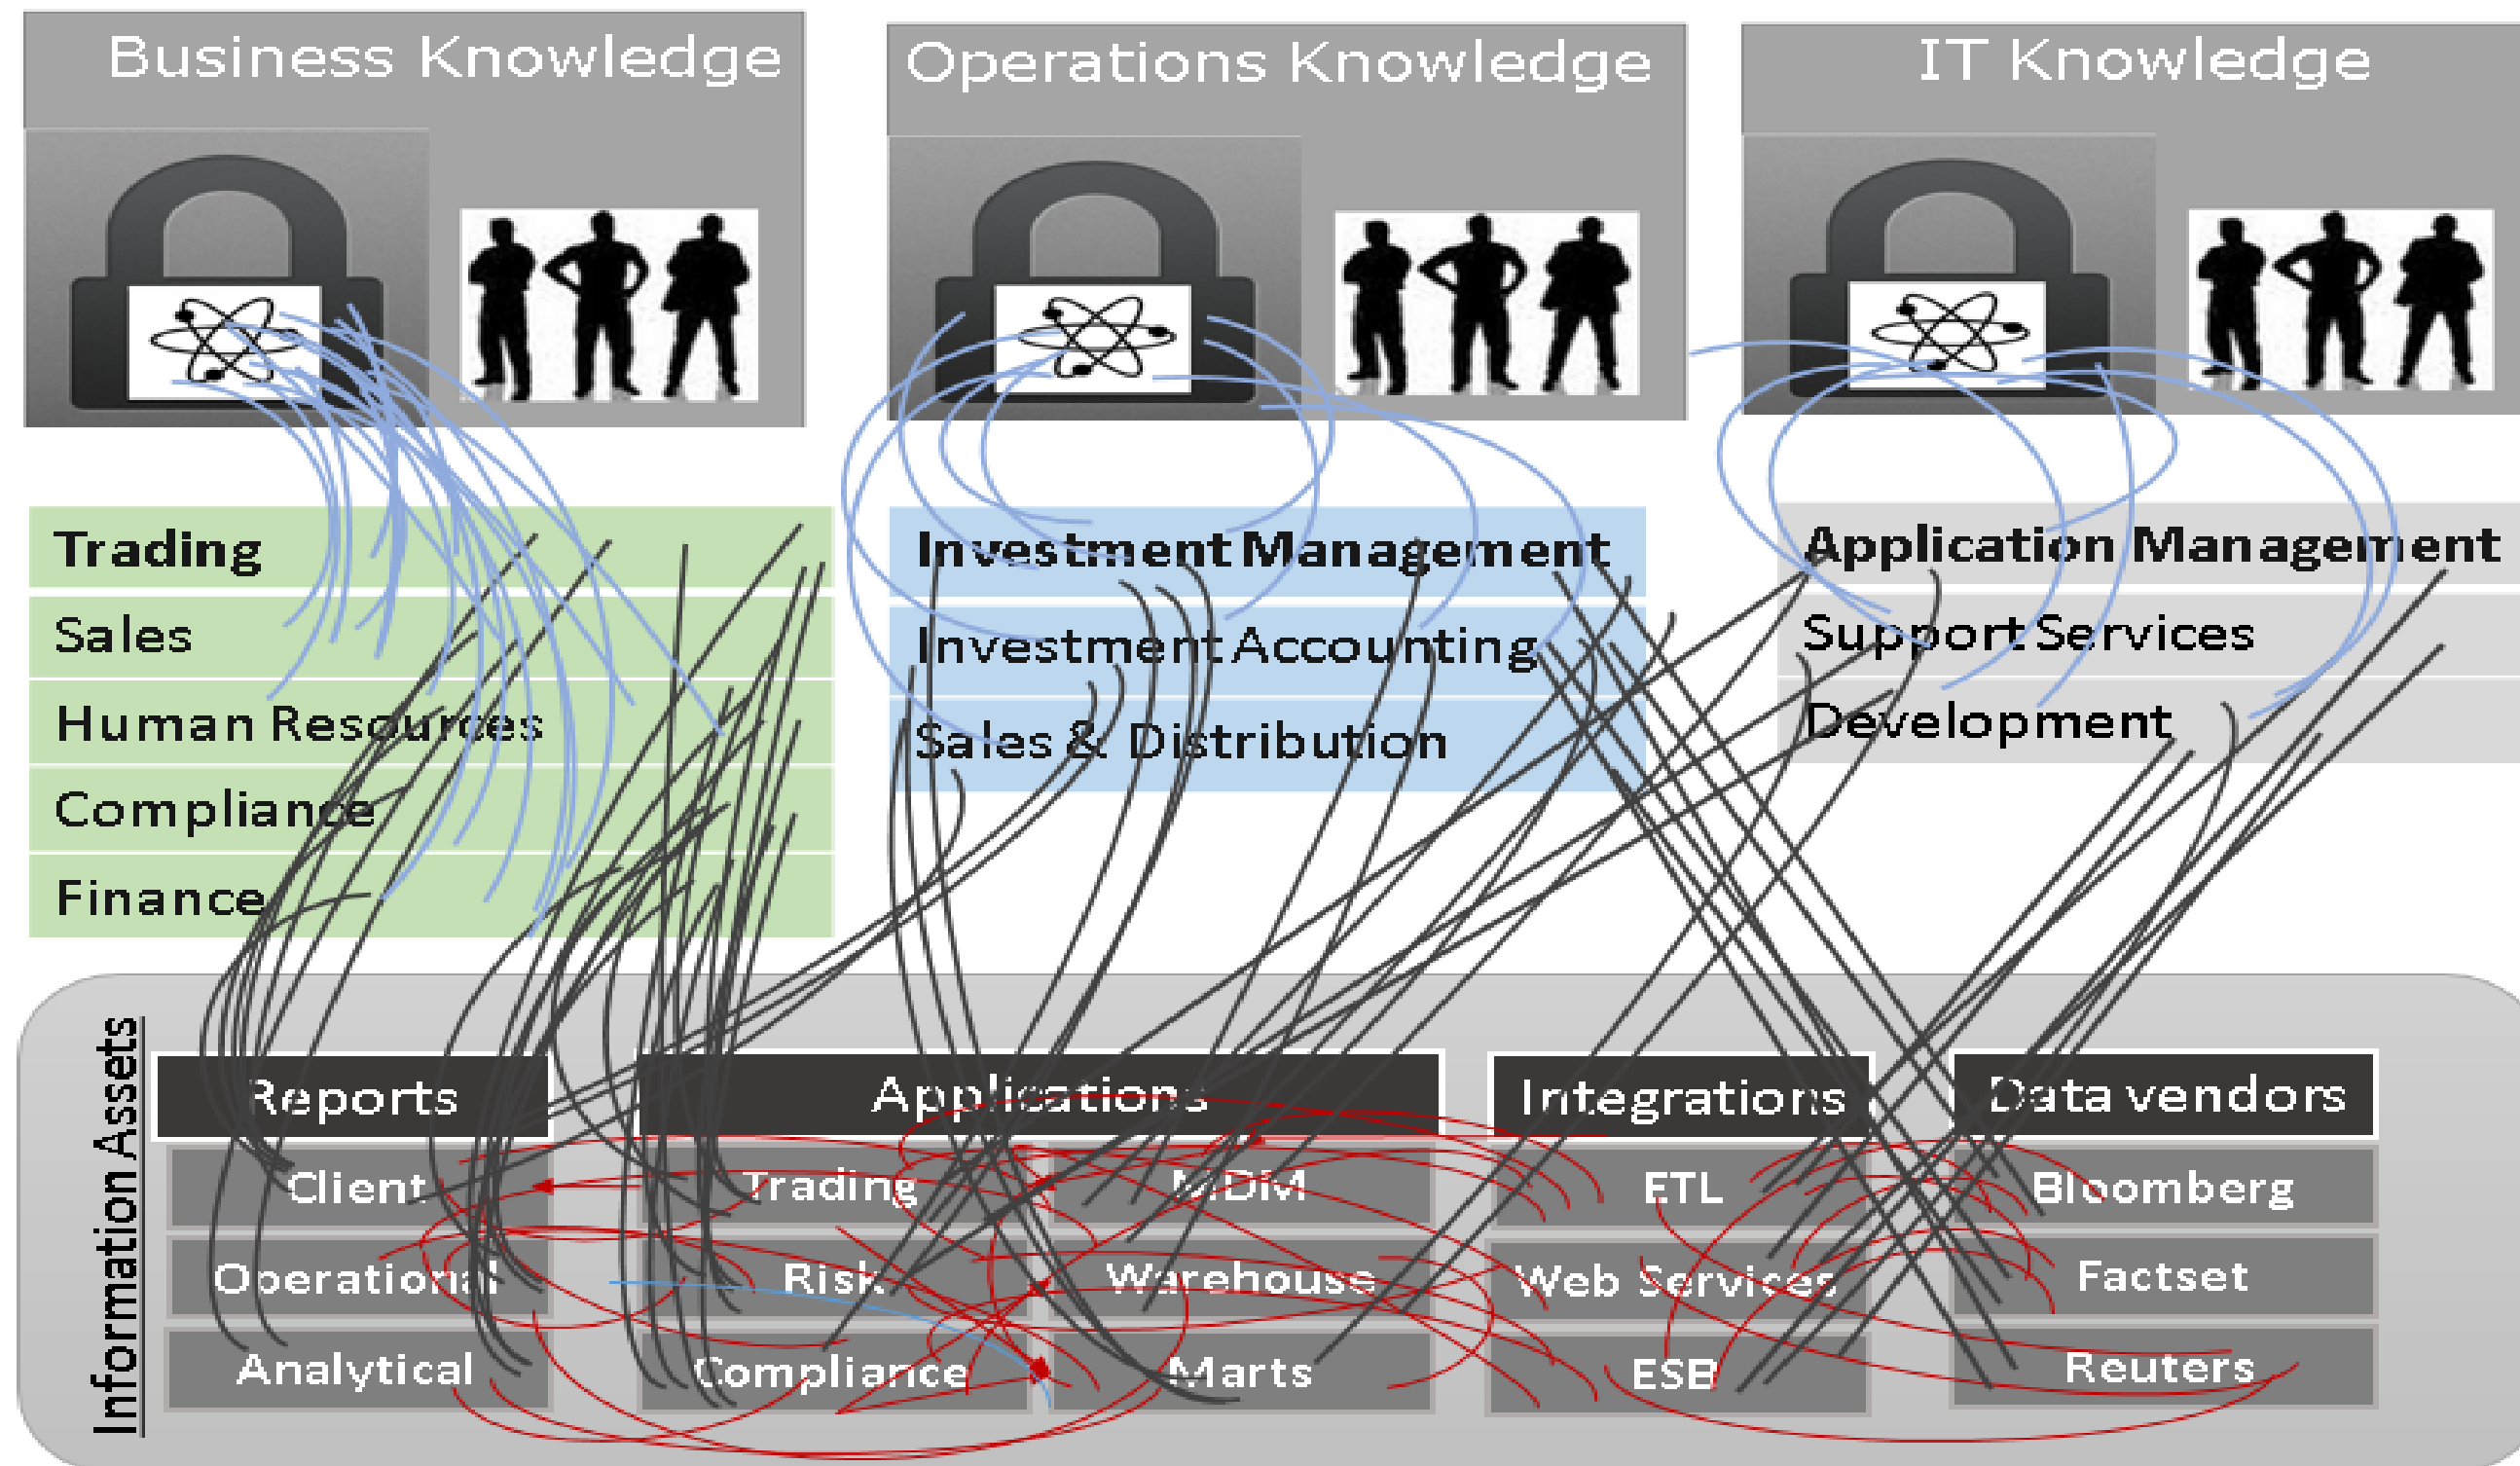

## Core Capabilities to Achieve Data Governance

- Prevent misunderstanding with clear data definitions

- Know an assets data quality score before using a data asset

- Quickly find data through glossary and collaborate with data owners/stewards

- Institute repeatable policies to control data

- Execute big data quality metrics by pairing with Infogix Data3Sixty Validate/Analyze modules
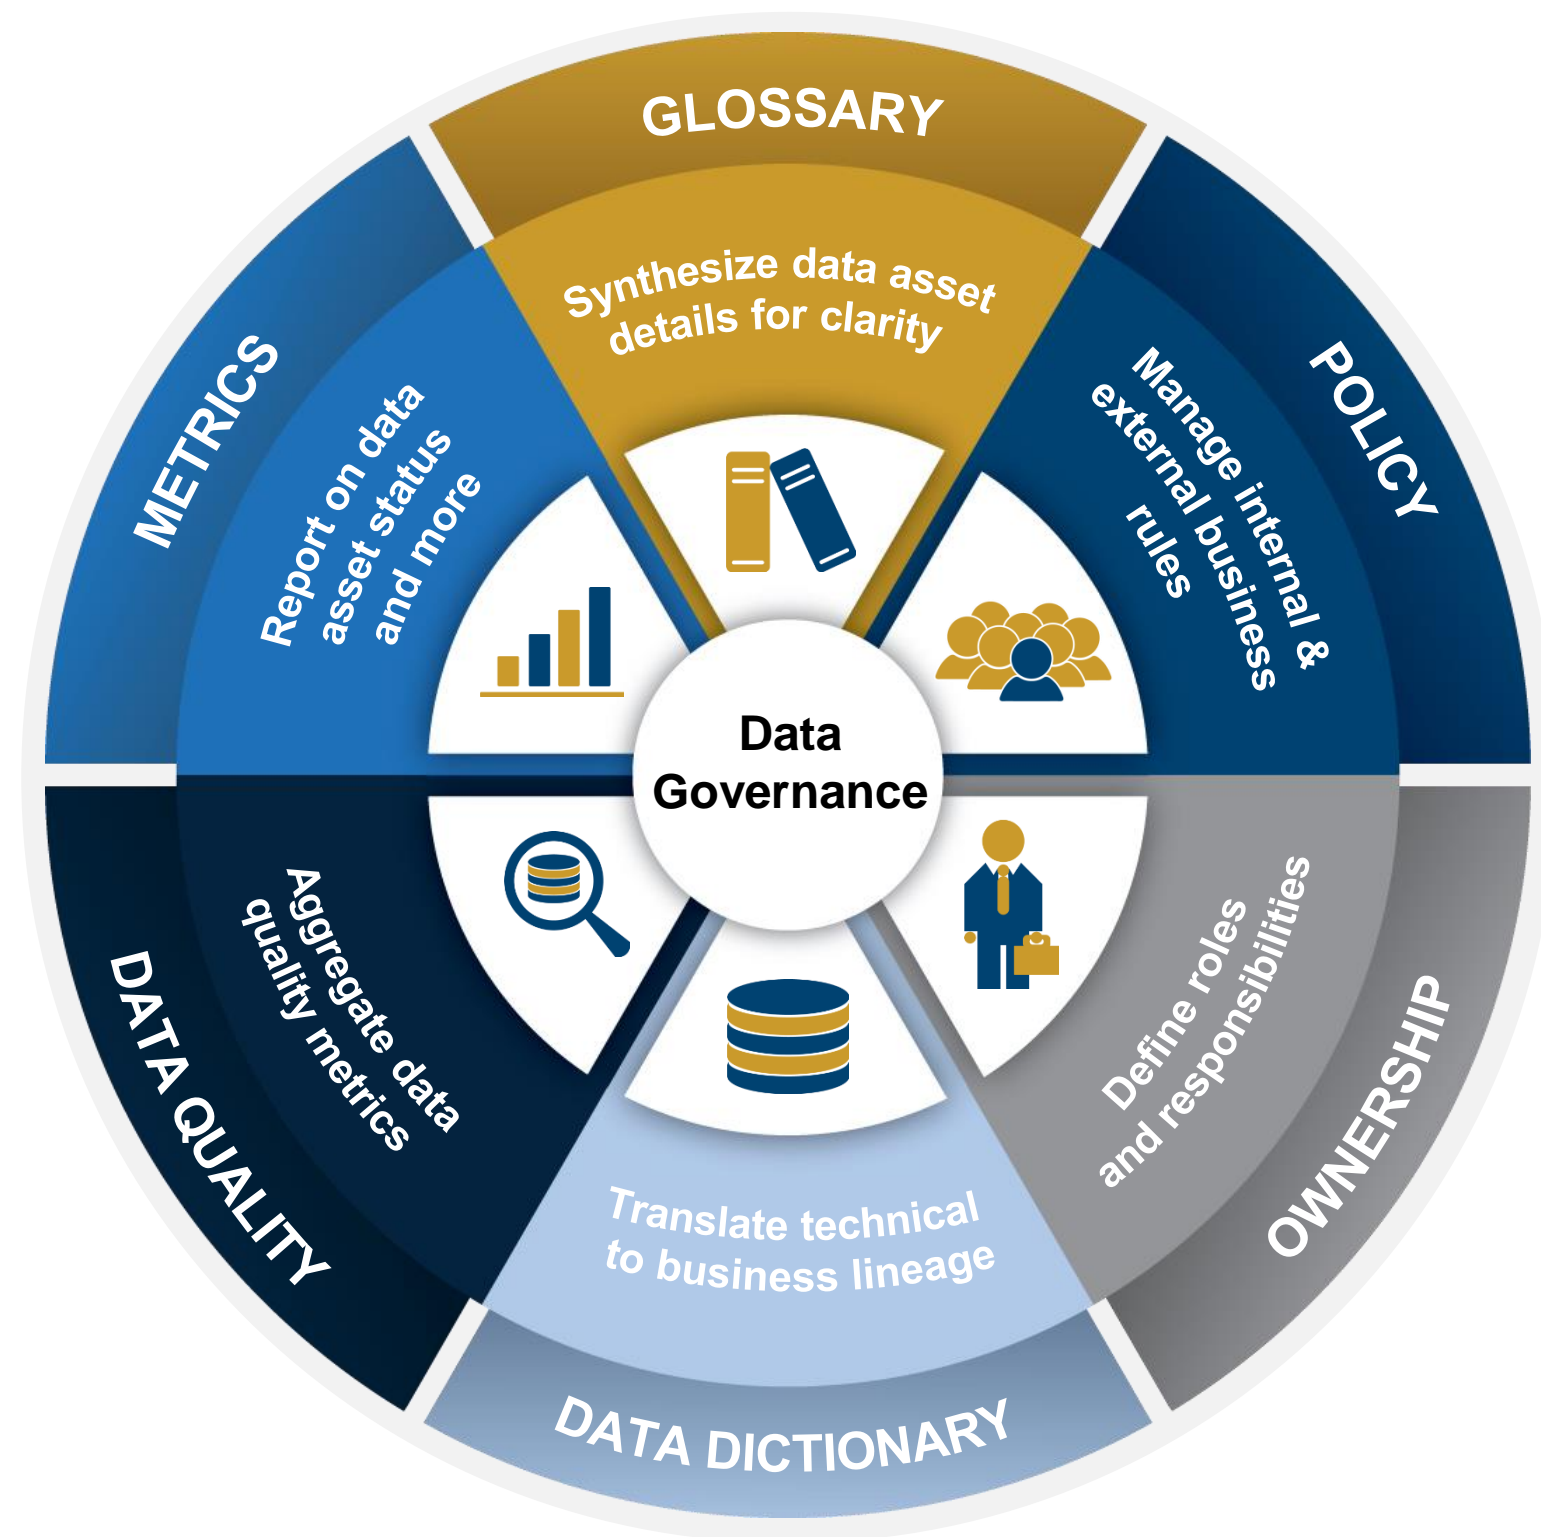

What Infogix Data3Sixty™ Govern Benefits

Better Data. Better Results.
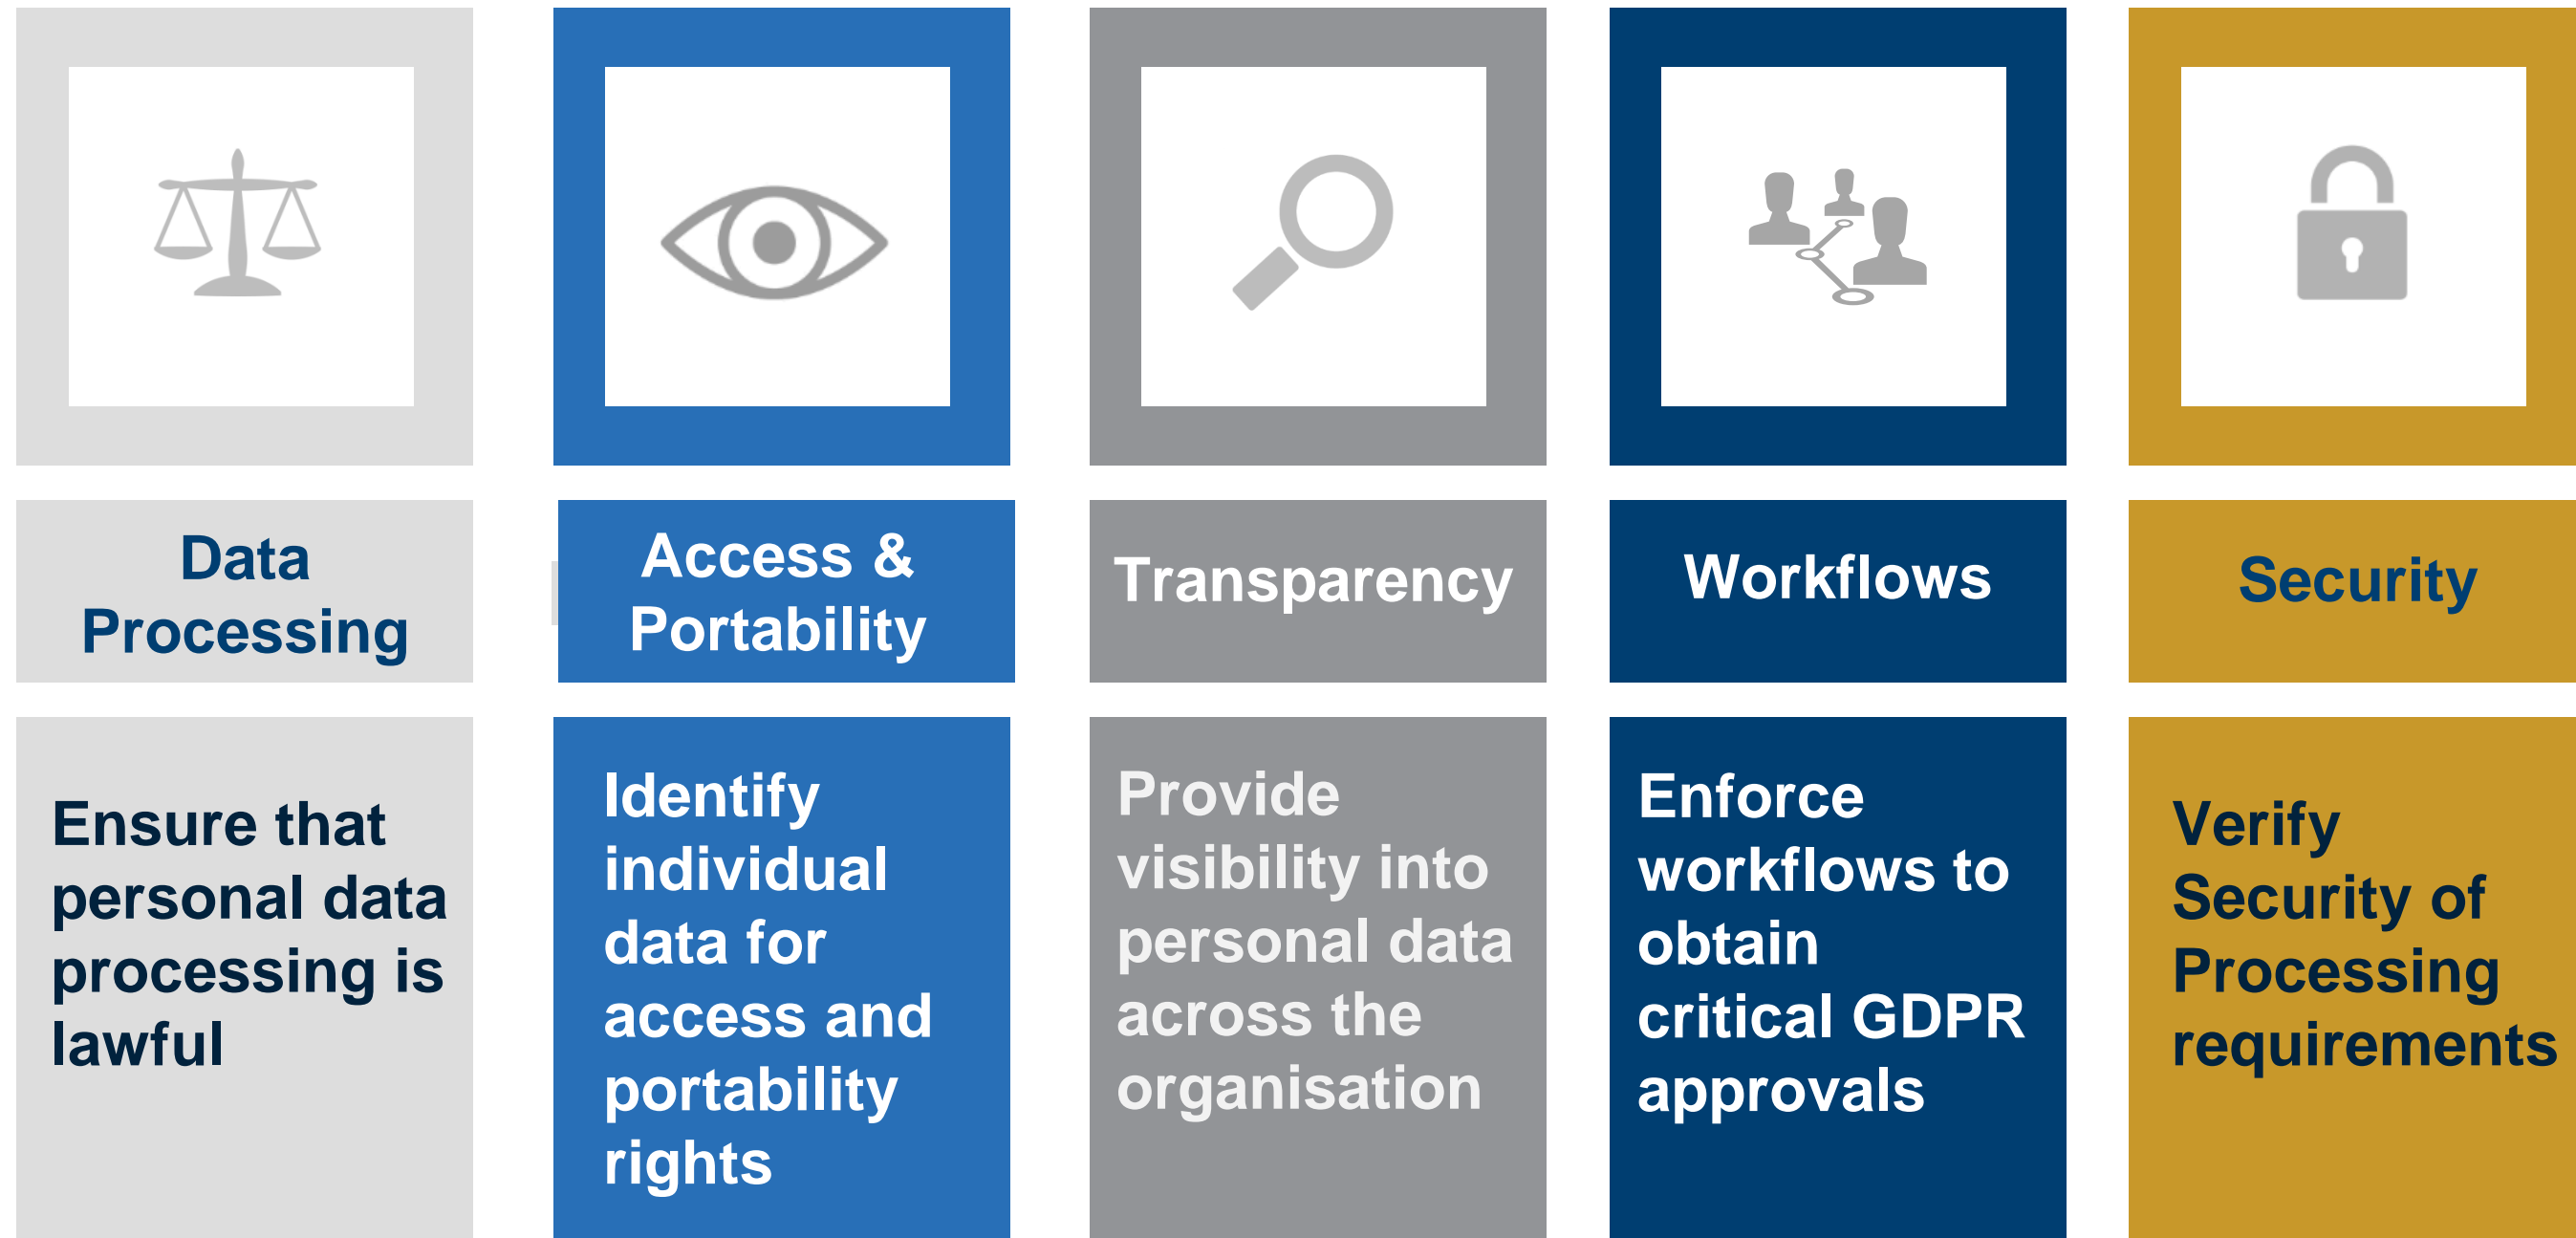

GDPR

The GDPR Solution

Infogix provides key pieces to a comprehensive GDPR strategy:

A framework of data governance

A foundation of data integrity

Organisation-wide data visibility

Facilitates collaboration & accountability

Infogix GDPR Solution

Infogix GDPR Governance: Practical Application

Data Processing	Access & Portability	Transparency	Workflows	Security
Ensure that personal data processing is lawful	Identify individual data for access and portability rights	Provide visibility into personal data across the organisation	Enforce workflows to obtain critical GDPR approvals	Verify Security of Processing requirements

Data3Sixty™ Validate

Infogix Data3Sixty™ Validate

Drag-and-Drop Nodes For Data Validation

- Packaged commonly used data quality checks
- Drag-and-drop nodes are easy to use, no coding necessary
- Validate nodes are integrated with data preparation, analysis, and governance capabilities
- No need to use/learn multiple tools
